

Petition of Time Warner Cable for Review of FCC Forms 1240 and Form 1205 for the Great Barrington, North Adams and Pittsfield Systems.

---

TIME WARNER CABLE'S RESPONSE TO FIRST SET OF INFORMATION REQUESTS BY  
THE DEPARTMENT OF TELECOMMUNICATIONS AND CABLE

Request

D.T.C. – I.R. 1-6      Referring to Time Warner's FCC Form 1205, provide a description of all changes made in the current form from Time Warner's previous Form 1205 filing. Include in Time Warner's response a detailed description of the methodology used to remove unregulated costs from the Form 1205.

**RESPONSE: The FCC has granted TWC effective competition in many communities since the filing of the previous Form 1205 and the current form includes fewer franchise areas than in the previous year. The most significant areas removed from the filing include many areas of the Ohio, Kansas City, and Wisconsin systems representing approximately 2.5 million customers.**

**When all communities in an operating area are granted effective competition, then no information for that operating area is included on the Form 1205. However, if only certain communities of an operating area are granted effective competition then an allocation is used since the relevant financials are not recorded at the community level.**
